Full Stack Developer

Summary

Highly motivated full-stack developer with expertise in front-end and back-end technologies, focused on building efficient, scalable, and user-friendly web applications. Skilled in problem-solving, clean code, and continuous learning, with a strong attention to detail and a collaborative, solution-driven approach.

Experience

Full Stack Developer

GUVI Geek Network, IITM Research Park | 05/2023 – 05/2024 - Developed a web application for booking, modifying, and canceling doctor appointments, with secure authentication for patients and doctors. - Created user-friendly interfaces, managed scheduling, profiles, and notifications, ensuring responsive design, optimized performance, and secure data handling.

Technical Skills

- **Languages:** HTML, CSS, JavaScript, Python
- **Frameworks:** React.js, Redux, Node.js, Express.js
- **Databases:** MongoDB, MySQL
- **Cloud:** AWS
- **Tools:** Git/Github, Bootstrap, Tailwind CSS, OAuth/JWT, API Development, CI/CD
- **Other:** Database Design, Error Handling, Performance Optimization, Collaboration, Adaptability and Continuous Learning

Projects

Doctor Appointment Booking Website

- Developed a web application for booking, modifying, and canceling doctor appointments, with secure authentication for patients and doctors.
- Technologies used: React.js, Nodejs / Express.js, MongoDB on AWS
- Outcomes: Gained practical experience in web development, improved problem-solving skills, and strengthened ability to build user-focused, scalable applications.

Food Delivery Website

- Built a responsive platform for browsing restaurants, ordering food, and managing orders.
- Technologies used: React.js, Nodejs / Express.js, MongoDB on AWS & Git / Github
- Outcomes: Gained hands-on experience in developing complex web applications, focusing on UI design, real-time data management, and secure payments. Enhanced skills in building scalable, optimized platforms.

Notes Maker Application

- A web application that allows users to create, organize, and manage notes easily.
- Technologies used: React.js, Nodejs / Express.js, MongoDB on AWS & Git / Github
- Outcomes: Enhanced user productivity through easy note creation, organization, and management. Improved accessibility to information with search and categorization features, delivering a seamless and efficient user experience.

Education

Full Stack Development

GUVI Geek Network, IITM Research Park | 05/2023 – 05/2024

Bachelor of Engineering, Mechanical

Jayam college of Engineering and Technology | 05/2013 – 04/2017

Certifications

- MERN Stack Development (04/2023 – 04/2024) - GUVI Geek Network, IIT Madras
- JavaScript Algorithms and Data Structures (09/2023 – 10/2023) - freeCodeCamp

Additional Information

Languages: Tamil (Native or Bilingual Proficiency), English (Full Professional Proficiency), Hindi (Limited Working Proficiency) Interests: Reading Books, Tech enthusiast, Cricket
