Full Stack Developer

Summary

Highly motivated full-stack developer with expertise in front-end and back-end technologies, focused on building efficient, scalable, and user-friendly web applications. Skilled in problem-solving, clean code, and continuous learning, with a strong attention to detail and a collaborative, solution-driven approach.

Skills

- **Languages:** HTML, CSS, Javascript, Tamil, English, Hindi
- **Frameworks:** React.js, Redux
- **Backend:** Node.js, Express.js
- **Databases:** MongoDB, MySQL
- **Cloud:** AWS
- **Tools:** Bootstrap, Tailwind CSS, Git/Github, OAuth/JWT
- **Other:** API Development, Database Design, CI/CD, Error Handling, Performance Optimization, Collaboration, Adaptability and Continuous Learning

Experience

Full Stack Developer

Self-Employed | 05/2023 – Present

- Developed a Doctor Appointment Booking Website using React.js, Node.js/Express.js, MongoDB on AWS. - Built a Food Delivery Website with React.js, Node.js/Express.js, MongoDB on AWS & Git/Github. - Created a Notes Maker Application with React.js, Node.js/Express.js, MongoDB on AWS & Git/Github.

Certifications

- MERN Stack Development (04/2023 - 04/2024) - GUVI Geek Network, IIT Madras
- JavaScript Algorithms and Data Structures (09/2023 - 10/2023) - freeCodeCamp

Education

Full Stack Development

GUVI Geek Network, IITM Research Park | 05/2023 – 05/2024

Bachelor of Engineering, Mechanical

Jayam college of Engineering and Technology | 05/2013 – 04/2017

Projects

Doctor Appointment Booking Website

- Web application for booking, modifying, and canceling doctor appointments with secure authentication.
- Technologies used: React.js, Nodejs / Express.js, MongoDB on AWS
- Impact: Gained practical experience in web development, improved problem-solving skills, and strengthened ability to build user-focused, scalable applications.

Food Delivery Website

- Responsive platform for browsing restaurants, ordering food, and managing orders.
- Technologies used: React.js, Nodejs / Express.js, MongoDB on AWS & Git / Github
- Impact: Gained hands-on experience in developing complex web applications, focusing on UI design, real-time data management, and secure payments. Enhanced skills in building scalable, optimized platforms.

Notes Maker Application

- Web application for creating, organizing, and managing notes.
- Technologies used: React.js, Nodejs / Express.js, MongoDB on AWS & Git / Github
- Impact: Enhanced user productivity through easy note creation, organization, and management. Improved accessibility to information with search and categorization features, delivering a seamless and efficient user experience.

Languages

- Tamil (Native or Bilingual Proficiency)
- English (Full Professional Proficiency)
- Hindi (Limited Working Proficiency)

Hobbies

- Reading Books
- Tech enthusiast
- Cricket
